

Elval Colour showcases its brands and solutions at the BATIMAT 2015 fair in Paris

Elval Colour, located in Hall 5A-Stand N95, **successfully presented** in an effective and **innovative way** its unique **solutions** which are **covering** a broad spectrum of **demanding applications**, at **BATIMAT** fair in Paris during 2-6 November 2015.

BATIMAT is the **world's most comprehensive showcase** of solutions, demos and training for all sectors of the **building industry**, promoting synergies across all trades and spearheading **innovation**. More than 2,400 French and international companies exhibited their products whereas the number of visitors exceeded the 350,000.

The **Elval Colour highlights** of the fair included **products** and **solutions** for building envelope applications, coated aluminium coils and sheets for roofing **Orofe**, **Ydoral** rain gutters, flashings, roller shutter applications, **ELVAL ENF™** coils and sheets, **etalbond** composite panels for façades, as well as the functional coating systems **Agraphon**® (Anti-graffiti) and **Arypon**® (self-cleaning).

A dedicated, eye-catching 3D-form cassette of hydro-formed etalbond, exclusively used for the landmark project of the new [Theater Tower Building in Amstelveen](#) -Netherlands, captured the interest across the board.

Business partners and visitors were also **excited** about the **brand new colors**, officially **introduced** and **creatively presented** at Elval Colour booth in BATIMAT. Impressive **texture** and **metallic** colors enable customers to choose among a wide variety of **innovative alternatives**.

Elval Colour is looking forward to attending the next BATIMAT fair in 2017. In the meantime, it remains **committed** to its vision to be a **reliable partner** that offers value added services to architectural and construction customers, not only by assisting in product specification and selection, but also by providing **high quality sustainable solutions** accompanied by **exceptional service**.
