ETEM's International Façade Conference: OnLine Magazine

On November 7th, 2015, the company ETEM organised for a third time the international conference on Façade Engineering in the city of Sofia. The event brought together more than 450 representatives of the construction industry, architects and representatives of institutions who had the opportunity to become familiar with the latest trends and concepts in the world of architecture and Façade Engineering.

More information about the event may be found at:
