

October 7<sup>th</sup>, 2014

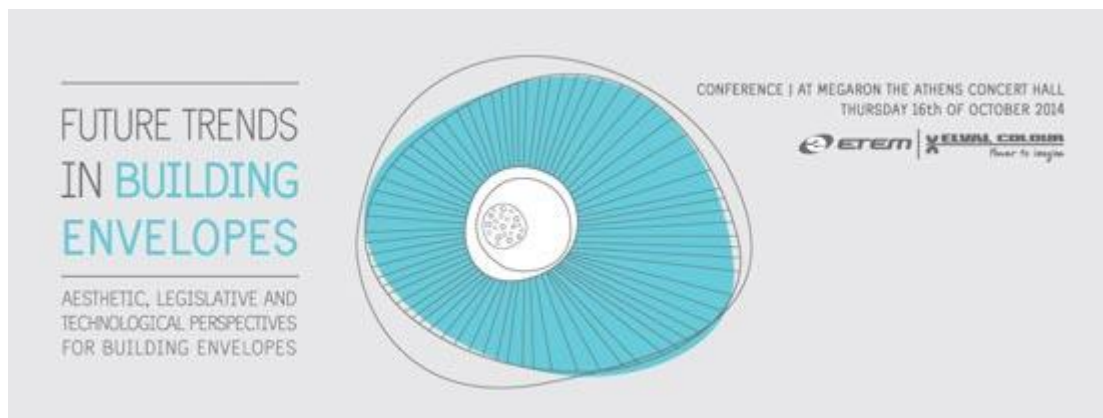

### Architectural Conference “Future Trends in Building Envelopes”

ELVAL COLOUR and ETEM are organizing a conference focusing on the aesthetic, legislative and technological perspectives for building envelopes. ‘Future Trends in Building Envelopes’ is the main theme of the conference that will take place on October 16<sup>th</sup> 2014, in Megaron – The Athens Concert Hall.

Through this conference, the organizers wish to:

- create cognitive stimuli in connection with technology, aesthetics and legislation on building envelopes.
- declare that they stand by the professionals of said sector in large and small scale projects, with specific suggestions which boost creativity and shape a new era market.
- present the materials potential use and their active role in a quality upgrading of the building environment.
- present European regulations (enactments – environment) and their influence in future constructions.

The topics will be elaborated upon by internationally acknowledged Greek and foreign speakers from the European Union, World Class Architectural Design Homes and Cladding Contractors, and European Universities and its target groups are: Architects, project designers, the academia, civil engineers, construction companies, constructors, architecture students, representatives of business and banking groups.

For more information on the conference you can visit the website:
