Elval to participate in the Posidonia 2016 Exhibition

Elval's High Magnesium family of products will be presented at Posidonia 2016 Exhibition, the largest international shipping event that will take place at the Metropolitan Expo Center from June 6th-10th.

Elval's marine solutions portfolio consists of Aluminium Alloy Sheets and Plates in various alloys suitable for the marine manufacturing sector (fast ferries, yachts and general shipbuilding). All these products present elevated mechanical properties, supreme corrosion resistance and excellent weldability, providing material suitable for exposure to highly corrosive environments such as seawater. Upon request, Elval provides shipbuilding materials certified by all major classification institutions that include the American Bureau of Shipping, Det Norske Veritas, Lloyds Register, Germanischer Lloyd, RINA, Bureau Veritas and Korean Register of Shipping.

To learn more about our marine aluminium solutions, visit our stand: Hall 1, Stand #1.410.

About Posidonia

Posidonia, the international shipping exhibition, is the largest gathering in the shipping calendar and takes place every two years in Athens, Greece. Posidonia serves as the main business platform that provides the global maritime industry direct access to Greek shipowners and their executives, operating the largest merchant fleet in the world with more than 4,000 vessels of 321m dwt, totaling 16% of world's tonnage. Few events can match the scale of this international event, which in 2014 welcomed more than 1.800 exhibitors from 93 countries and over 19.000 visitors, numbers expected to be surpassed this year. Posidonia week is renowned for the many opportunities it creates to sign business deals, make new contacts, enforce old friendships and network with senior executives of the shipping industry.

About Elval

Elval is a leading aluminum manufacturer in Europe. Elval's manufacturing base includes seven production plants in Greece and manufactures numerous aluminium products that meet the requirements of the packaging, construction, transportation and automotive industries, among others. Elval exports to more than 80 countries around the world and has trading facilities in seven European countries. The Elval Group is part of the aluminium processing and trading segment of Viohalco SA, the holding company of various metal processing companies in Europe.
